Epilepsy Seizure Movement Alarm Medpage MP5V2 High Sensitivity Seizure Monitor

ORDER CODE MP5V2
PRICE £270.00 + VAT
VAT exemption available

- Medpage specialist epilepsy movement detection alarm for Tonic/Clonic seizure movement detection
- Large area patented movement sensor technology for improved movement detection from most bed and seizure movement types
- Tonic/Clonic nocturnal seizure movement detection
- Alarm notifications via radio pager (includes 2 x MPPL pagers)
- Quick and easy to set up
- Suitable for children and adults.
- Suitable for Cots/Cribs with memory foam mattresses, single & double beds

The high performance sensor and control software positively identifies seizure movement from a sleeping person, ignoring usual sleeping movements. Verified ongoing seizure movement results in alarm notification transmission to the carer pagers. The sensor (300mm x 200mm x 10mm) has a control to allow adjustment for body weight and bed/cot mattress type. An alarm delay with adjustment from 2-30 seconds allows a person to turn over, or reposition themselves without alarm generation. Included Wi-Fi camera with real time viewing also records seizure activity for viewing on a Smartphone.

Medpage MP5-UT Seizure movement detection alarm Children - Adults

The MP5-UT uses patented sensor technology specifically engineered to detect Tonic/Clonic seizure movement from a sleeping person.

- Detected seizures are notified via the MPPL pagers with tone or vibration alert
- Suitable for babies from age 1 month to adults
- Supplied with 2 carer pagers (1 free) so that both parents can be alerted to detected seizures
- Digital sensitivity control
- Sound sensor detects vocalisations preceding or during a seizure
- Digital alarm delay control virtually eliminates false alarms by ignoring natural sleeping movements such as turning over
- Tamper proof settings & fault reporting to pagers

ORDER CODE MP5-UT PRICE £170.00 (£204.00) VAT Exemption available

MP5-UTB Epilepsy bed movement seizure detection alarm

The MP5-UTB is a reliable nocturnal seizure movement detection alarm for babies through to adults at an affordable price. A portable battery-operated alarm with flashing coloured lights and adjustable audible alarm raises an alert to the carer of detected seizure movement.

- Adjustable sensitivity to suit the needs of the user
- Digital alarm delay control virtually eliminates false alarms by ignoring natural sleeping movements such as turning over
- Digitally stored tamper proof settings
- Inbuilt sound sensor detects vocalisations preceding or during a seizure
- Optional plug in under pillow vibrating pad to assist deaf carers (VIB-PAD)

ORDER CODE MP5-UTB PRICE £170.00 (£204.00) VAT exemption available
See page 12 for optional power supply and vibrating pillow shaker for alarm unit

MP2-V2K Medpage seizure movement detection alarm for care homes

The MP2-V2K uses patented sensor technology to detect typical seizure movement from a sleeping person in bed. Carers are alerted to ongoing seizures via a digital message pager (EM300) with tone/vibration alert. Each monitor has a long range transmitter, which is programmed with your chosen message (default for a single alarm system is Medpage Seizure Alarm 1).

- Long range (up to 400M) wireless alarm to carer message pager
- Suitable for use in larger buildings
- Adjustable sensor sensitivity
- False positive alarm delay control
- Suitable for babies to adults
- Detection of Tonic/Clonic seizure movement
- Vocalisation microphone with alarm to pager
- Can connect to Nurse Call and/or Telecare equipment

Seizure movement monitor including 1 x EM300 pager

ORDER CODE MP2V2K PRICE £255.00 (£306.00) See website for more details

MP5-ULTRA Advanced seizure movement detection alarm with detection mode selection and carer alarm pagers

The most advanced epilepsy monitor in the MP5 range. Advanced software algorithms continually analyse sleeping movements to positively identify seizure activity. Suitable for complex epilepsy and specialist beds including airflow mattresses.

- Detected seizures are notified via MPPL pager (2 supplied) with tone or vibration alert
- Programmed with selectable seizure detection modes
- Digital movement delayed alarm control
- Inbuilt sound sensor to detect vocalisations preceding or during a seizure
- Large area patented monitoring sensor technology offers improved movement detection
- Digital alarm delay control virtually eliminates false alarms by ignoring natural sleeping movements such as turning over
- Tamper proof settings & fail safe alarm to pagers
- Tonic/Clonic and seizure movement with twitching
- Myoclonic cluster seizures
- Airflow mattress mode
- All Medpage seizure movement monitors have 36-hour battery backup
- Suitable for all ages: babies - adults
- Nurse call and Telecare systems output connection

ORDER CODE MP5-ULTRA PRICE £439.00 (£526.80) VAT exemption available

All Medpage seizure movement monitors are supplied with a 36 month warranty

Medpage Limited T/A Easylink UK, established 1984, have provided solutions to aid epilepsy care for over 25 years, specialising in the design and manufacture of monitors that detect seizure movements from a sleeping person in bed. To ensure the highest product quality and safety, our company is accredited by BSI to ISO 9001:2015.

At Medpage Limited, we take great care in the design, manufacture and after sales support for our seizure movement alarms. When you purchase an epilepsy seizure movement alarm from Medpage, our highly trained team are readily available for help, advice, and technical support, if needed, to ensure your monitor operates at maximum efficiency. Our technical support is provided at no extra cost.

RFWFS1K Wi-Fi Smart Plug kit for use with Amazon Alexa, Google Home or with RF pendant transmitter button

The RFWFS1 differs from the majority of Smart Sockets in that it has a built-in radio receiver to allow additional control of the socket with the included pendant transmitter button. The socket can be controlled from a Smartphone, by a Smart Speaker such as Amazon Echo or Google home and by the pendant button, which works independently of a Wi-Fi connection, useful if the internet is not working or outside Wi-Fi range.

Suitable for appliances rated up to 10amp (2200watt)
Control appliances using your Smartphone with Smartlife APP

ORDER CODE RFWFS01K PRICE £29.99 (£35.99)

MEDWFM Wi-Fi connected movement sensor with Smartphone alarm APP

Setting up the MEDWFM takes only a minute or two. Download the user APP to your Smartphone and connect to a home or business Broadband router (2.4GHz only). The user-friendly intuitive APP notifies you if a person walks into the detection beam of the PIR, through the internet to your Smartphone, recording the date and time of the alert. You can check if someone is moving around in the home (parents, elderly relative or potential thief).

- Provides a simple security solution with event date and time record
- Receive an alert if a person enters your home or business premises
- Free to use APP for Android and iOS (no subscription or rental charges)

WiFi movement sensor **ORDER CODE MEDWFM PRICE £29.12 (£34.95)**

WFSOSB11 Wi-Fi waterproof SOS panic call button for Smartlife APP

- Lightweight waterproof Wi-Fi pendant call alarm for off-site emergency contact
- Wear it with a lanyard or stick it on a wall or hard surface
- APP for Smartphone provides alarm notifications with time/date record (also has 433MHz RF transmitter)
- Quick and easy setup of rechargeable pendant using Tuya Smartlife APP

ORDER CODE WFSOSB11 PRICE: £20.83 (£25.00)

MEDWFD Wi-Fi connected door alarm with monitoring APP

The MEDWFD is a useful door/window alarm sensor, which connects through your home or business Broadband (2.4GHz only) and is configured via a Smartphone APP (Android or iOS). The APP provides a comprehensive selection of features, including choice of alarm notifications and sensor labelling.

- APP records date & time of door events
- Can also be used on food cupboards and fridges
- Beneficial in the care of people with dementia or cognitive impairment for wander detection
- Can be used with multiple sensors for home and business protection

Wi-Fi door/window sensor **ORDER CODE MEDWFD PRICE £24.95 (£29.94)**

POC-DCK Long range (400M) door alarm transmitter with digital message pager

When a door or window alarm transmitter is required with longer transmission, this kit provides a good solution. The compact transmitter (POC-840DC) is programmed to send location messages to the EM300 message displaying pager. Unlimited transmitters can be used with a single or multiple pagers.

- Use for wander detection & general door/window security with door location message
- Suitable for single or multiple alarm transmitter systems
- Suitable for domestic, Care Home and Hospital use
- Factory programmed default message 'Door Alarm 1'
- Tone/vibrate alert pager powered by 1 x AAA battery

Long range door alarm kit **ORDER CODE POC-DCK PRICE £132.00 (£158.40)**

MPPL-MSKIT PIR movement sensor transmitter with pager

This easy to install movement alarm kit can be used for general security. It is also beneficial to aid care for the elderly and those living with dementia. When the sensor detects movement an alarm signal is transmitted to the pager.

- Use for bed leaving detection and wander alerts - protect stairwells and doorways
- Long battery life for PIR & pager (6-12 months)
- Transmitter range up to 100M
- External power on/off switch for PIR
- Tone/vibration alert pager

PIR with pager **ORDER CODE MPPL-MSKIT PRICE £59.00 (£70.80)**

DRXTMSKIT Movement detection PIR wander detection kit with portable alarm

Detect an elderly patient or a person with dementia wandering during day or night with this easy to use movement detection alarm kit.

- An alert is transmitted to a carer when a person walks through a doorway, enters a room, exits the home or enters a high-risk area
- Includes NMDRXT 5-Channel carer alarm receiver
- Quick and easy installation
- Narrow PIR detection angle allows use as a break beam alarm
- Quick and easy to set up - use straight out the box

PIR with NMDRXT receiver **ORDER CODE DRXTMSKIT PRICE £63.00 (£75.60)**

TUMMSKIT Narrow beam PIR movement sensor with alarm pager

Motion detection sensor with alarm pager kit. The motion sensor has a switch to select audible alarm or integral 433MHz transmitter. On movement detection the selected alarm type is activated, pager or audible tone.

- Movement sensor with pager alarm
- Perfect to warn a carer of elderly wandering or bed exit
- Narrow beam PIR sensor
- 3-Channel pager with tone/vibration alert
- Carer movement alarm pause button

PIR with Pager **ORDER CODE TUMMSKIT PRICE £54.00 (£64.80)**

POC-PIR Message programmable Movement Sensor

When multiple Movement Sensors are required in larger buildings such as Care Homes, Hospitals or buildings known to have signalling difficulties, the POC-PIR is the perfect solution. Furthermore, messages can be programmed to enable location, device, or zone ID to be read from our digital message display pagers (EM300/EM400). Ideal for wander detection, bed leaving detection and general security use.

- Message programmable movement alarm
- Long range transmission - 400M+
- Radio frequency: 433MHz
- Low standby power consumption
- Side power on/off switch
- Dimensions: 107 x 59 x 39mm
- Weight: 40g
- Power: 2 x AA batteries
- Supplied with wall mount bracket
- Status LED for power/transmission/signal
- Compatible with EM300 & EM400 pagers
- Compatible with MP900 internet hub
- Supplied with standard message "PIR ALARM" and configured to standard pager radio address code.

Programming software download available for Windows

ORDER CODE POC-PIR PRICE £46.40 (55.68)

MULTI-FUNCTION LONG RANGE UNIVERSAL TRANSMITTER 400M+

The NMDTX2 is designed to operate with all Medpage pressure mat sensors and can be programmed to transmit messages for display on the EM300/EM400 message display pager.

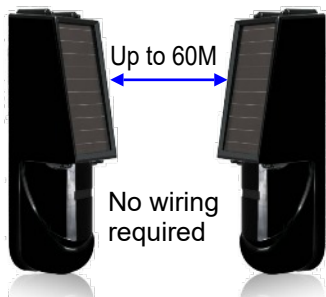

Selectable operating modes

- Bed occupancy detection
- Chair occupancy detection
- Floor pressure mat
- MPPL signal repeater
- Alarm input trigger socket N/O N/C
- Transmitter range 400M+
- Message programmable
- Frequency 433MHz
- Can connect to MP900 IoT hub for Smartphone notifications
- Status LED power/transmit
- Power 2 x AAA/AC adaptor

ORDER CODE NMDTX2 PRICE £56.00 (67.20)

Solar powered break-beam photoelectric intruder alarm MED-PEB

- Solar powered photoelectric infrared beam alarm
- Built in radio transmitter to signal Medpage alarm receivers (MPPL, TUMPAG31, NMDRX)
- Quick and easy beam alignment – up to 60M
- No need for external power sources
- Alternative to PIR movement sensors
- Alarm generated only on direct break-beam
- Invisible infrared dual beams
- No false alarm from small rodents or birds
- Easy beam alignment using fine tuning controls

ORDER CODE MED-PEB PRICE £150.25 (€180.30) PRICE FOR BEAM SET ONLY

This beam set provides a quick and easy security solution indoors or outdoors (IP67). An intruder or larger animal passing through the beam will generate an alarm transmission with a range up to and beyond 100 Metres. The Medpage alarm receivers MPPL, TUMPAG31, NMDRX provide wire-free notification of a security breach.

FT47C-DTXK Photoelectric break beam sensor alarm kit with long range transmitter and digital message pager

The FT47C-DTXK is a compact photoelectric beam set suitable for indoor and outdoor use (shower proof only) to create an invisible narrow beam security solution. An object, person or animal walking through and breaking the beam results in an alarm transmission to the EM300 data message pager.

- Long range alarm transmission (up to 400M)
- Beam range (strong sunlight) 8-12M (low sunlight) 15-17M
- Programmable alert messages (when used with data pager EM300)
- Working voltage IR transmitter 2 x AA Alkaline batteries
- Typical battery life 12 months 10 ops per day
- Working voltage IR receiver: 12V DC power adaptor or battery
- IP rating: IP55 outdoor use (shower proof)

**ORDER CODE
FT47C-DTXK**

PRICE £151.00 (€181.20)

MPPL-PMK Floor pressure mat alarm with radio pager

Our best-selling floor pressure mat alarm is ideally suited to the domestic user. The mat is easily concealed under a rug or carpet next to an exit door or the user's bed. When the user steps on the mat, the carer is notified via the MPPL pager.

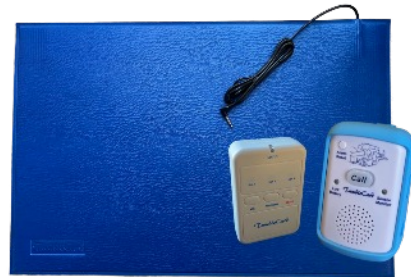

- 100M transmission range
- 3 alert options: vibrate only, vibrate and low tone or vibrate and high tone
- Robust, lightweight pager with a sturdy belt clip
- Low battery warning for uninterrupted user monitoring
- Pressure mat measures 750mm x 450mm with a 3M connection lead

Complete kit **ORDER CODE MPPL-PMK PRICE £75.00 (£90.00)**

TUMFMMPLK *TumbleCare* large heavy duty non-slip floor pressure mat alarm kit

The non-slip heavy duty pressure mat is positioned on the floor next to the patient's bed. Standing on the mat results in alarm transmission to the caregiver pager. Suitable for home care, Care Home and Hospital use. Can also be used at entrance doors and for general security.

- Mat measures 71.44cm x 60.96cm
- Dual surface - carpet grip and rubberised surface
- Includes nurse call transmitter (BTXMED04)
- Includes caregiver pager (TUMPAG31)
- Suitable for single or multi-patient monitoring (up to 3)
- 3-Metre sensor connector cable

Complete kit **ORDER CODE TUMFMMPLK PRICE £129.81 (£155.77)**

PM-POCKIT Floor pressure mat alarm with long range (400M) message transmitter & data message pager

The PM-POCKIT is recommended for larger buildings, stone-built properties or buildings with known signalling difficulties. The pressure mat (750mm x 450mm) can be positioned under rugs or carpets and will transmit an alarm signal when a person stands on it.

The kit comprises of NMDTX2 long range POCSAG transmitter, 1 x CT-3 pressure mat and 1 x EM300 pager. An unlimited number of long range devices can be configured into a multiple care system. Single kit default message "Pressure Mat Alarm".

Complete single kit **ORDER CODE PM-POCKIT PRICE £142.17 (£170.60)**

FLOOR PRESSURE MAT ALARMS

DTXTUMO4K *TumbleCare* Heavy duty non-slip floor pressure mat with long range transmitter (400M) & digital data message pager

This kit is recommended for larger buildings, stone-built properties or buildings with known signalling difficulties. The pressure mat (91cm x 61cm) can be positioned on top of rugs, carpets, or directly on hard floors and will transmit an alarm signal when a person stands on it.

The kit comprises of NMDTX long range POCSAG transmitter, 1 x MED-04FP pressure mat and 1 x EM300 pager. An unlimited number of long range devices can be configured into a multiple falls care system. Single kit default message "Pressure Mat Alarm".

Single system kit **ORDER CODE DTXTUM04K PRICE £182.00 (£218.40)**

NMDRX-CTMFP Floor pressure mat alarm with transmitter & portable alarm

This kit includes the CT-3 pressure sensor, NMDRX audible/flashing light alarm and the CTM-3 voice alarm transmitter. A warning message can be recorded for playback when a person stands on the mat. A signal is transmitted to activate the NMDRX.

- Dual purpose alarm - voice prompt and carer alert
- Use for dementia care wander detection
- NMDRX can pair with up to 5 sensors to create expanded care systems

Complete kit **ORDER CODE NMDRX-CTMFP PRICE £102.99 (£123.59)**

WT-ELB Wi-Fi connected floor pressure mat alarm with Smartphone alerts

For families concerned about elderly relatives living alone, the WT-ELB floor pressure mat alarm will provide peace of mind and valuable time/date stamped information of daily living habits. The powerful free Smartphone APP allows you to set times when the sensor is active and choose the type of alert you want to receive to your phone. When activated, the Wi-Fi controlled sensor will send an alarm signal to your Smartphone via your home/business Wi-Fi connection.

- Wander detection - fall prevention
- Controller powered by 2 x AAA batteries
- Under carpet/rug pressure sensor (750mm x 450mm)
- Pair with home/business broadband (2.4GHz only)

Complete kit **ORDER CODE WT-ELB PRICE £86.66 (£103.99)**

BTXMED04 pressure sensor alarm transmitter (433MHz)

- Pressure sensor pad alarm controller
- Wireless alarm signal to carer receiver
- Tough durable design
- Supplied with rubber protection jacket
- Selectable alarm response (instant, delayed 15 minutes, delayed 30 minutes)
- Suitable for individual or multi-patient systems
- Nurse call peer push input socket
- Central illuminated patient call button
- Alarm reset button
- Sensor pad strain relief protector

ORDER CODE BTXMED04 PRICE £41.21 (£49.45)

PRICE £61.00 (£73.20)**

TUMPAG31 New - TumbleCare 3-Channel caregiver alarm notification pager

The new TUMPAG31 3-channel pager by Medpage provides reliable carer notifications with audible tone & vibration alert. Each channel has an active alarm indicator LED. Monitor up to 3 bed or chair alarms, door or movement sensors.

ORDER CODE TUMPAG31 PRICE £28.20 (£33.12)

TumbleCare is a new brand of fall detection/prevention products by Medpage, launched 2020/2021. With over 30 years worth of experience within the Healthcare sector, our skills and knowledge are focused into our new range of products designed to deliver affordable, reliable performance for home and professional care providers.

Bed and chair falls wireless sensor pad alarm controller

The MPCSA11 is a radio linked sensor monitor transmitter, designed to provide the essential features required for a modern patient falls monitoring system while maintaining ease of use and setup. The CSA11 is compatible with cordless and cabled bed, chair and floor pressure mat sensors.

A feature unique to the CSA11 is last sensor detection alarm reset. This feature can help to track a person leaving their bed and moving to a chair without an alarm generation. Additionally, a movement sensor can be added to create a comprehensive mobility monitoring system with a last detection timeout alarm to a carer radio pager or telephone emergency dialler to alert off-site carers to a potential fall.

- Suitable for single or multiple patient bed/chair exit with pager alarm notification
- monitor 3 cordless sensors with RF link alarm output to nurse call system
- Peer push switch and nurse call connection socket
- Turn patient alarm pause button
- Monitoring for up to 3 wireless sensors: bed, chair, PIR, door alarm

ORDER CODE MPCSA11 PRICE £78.10 (93.72) FULL SPECIFICATIONS

Competitively priced kits available for professional care. Contact [sales](#) for details

New Bed exit sensor with dual pressure sensors

Dual sensor bed edge detection pressure pad for use with the MPCSA11 falls system. Edge sensors detect a person sitting or rolling to the edge of the bed. The central sensor detects body weight from the middle of the bed.

Default delay setting in the centre greatly reduces the incidence of false alarms

Repositioning in bed e.g. rolling over onto one side will not cause an alarm

Sensor pad initiates the alarm when patient sits up and moves toward the edge of the bed

- Suitable for single & double size beds
- Supplied with clips to secure sensor to mattress
- Central and bed edge body weight detection
- Chlorine resistant sensor material
- System transmitter concealed in mat pocket
- Mat dimensions L 82cm W 26cm D 5mm
- Bed exit alarm transmission notification to alarm receiver (PAG-11, TUMPAG31, CMD11, MPCSA11)
- Can be used one-to-one with any of the alarm receivers or as part of a multi-patient system.

ORDER CODE WPAS10 Price £61.53 (£73.83)

BED LEAVING ALARMS FOR SINGLE OR MULTIPLE PATIENTS

CTM-3KIT Bed leaving detection alarm with recordable voice alarm and pager

The majority of falls occur in the home when a person leaves their bed. With the CTM-3, a voice recording can be made for playback when a person rises from their bed, along with an alarm transmission to the included MPPL tone/vibrate carer alarm pager.

- Can help reduce falls and potential wandering with advanced warning of bed leaving
- Integral transmitter with operating range of 100M
- Under mattress pressure sensor 750mm x 450mm
- Instant (3 second) or 15 minute delayed alarm
- CTM-3 can switch to floor pressure mat mode
- CTM-3 Powered by 3 x AAA batteries or AC adaptor

Bed leaving kit **ORDER CODE CTM3-BKIT PRICE £94.00 (£112.80)**

NMDRX-CTMB Bed leaving detection alarm with wireless audible/flashing alarm

This kit includes the CTM-3 voice alarm transmitter, bed pressure mat CT-3 and the NMDRX wireless tabletop alarm. The NMDRX is a 5-Channel alarm, which enables the inclusion of additional sensors, such as: Door alarms, worn fall sensors (FA6) or PIR (TUMPIR21). A comprehensive home care system is easily configured.

- NMDRX suitable for deaf/hearing impaired carers
- 5 Independent flashing LED colours to assign to alarm channel

Complete kit **ORDER CODE NMDRX-CTMB PRICE £102.00 (£122.40)**

NMDTXRM-CT3B Bed leaving detection kit with channel selectable alarm transmitter

This kit includes the CT-3 bed pressure mat, NMDRX 5-Channel alarm receiver and the NMDTXM multi-function sensor transmitter. The transmitter channel codes are easily changed to allow additional bed monitors to be included in a system (up to 5), with the NMDRX indicating an active alarm with different coloured flashing channel LED's.

- NMDTXM powered by 2 x AAA batteries
- Transmission range up to 200M

Complete kit **ORDER CODE NMDTXRM-CT3B PRICE £96.31 (£115.57)**

TUMAC1 Home carer falls prevention kit

TumbleCare®

The TUMAC1 Provides an effective solution for detecting and dealing with falls quickly in the home. During the day, the fall sensor can be worn with the included wrist strap or lanyard. The gravity change sensor responds rapidly to sudden changes in height resulting in an alarm transmission to the caregiver pager. For night-time monitoring the bed alarm pressure sensor is placed under the bed mattress. If the user exits the bed an alarm signal is transmitted to the caregiver pager.

Key Features

- An effective solution to detect and help prevent falls in the home or in care
- Includes fall detection sensor pendant and bed leaving alarm for round the clock monitoring
- Waterproof fall sensor with SOS call button ideal for showering
- Caregiver pager with tone and silent vibration for effective alarm notification

This kit includes: 1 x TXP11 fall pendant, 1 x TUMPAG31 caregiver pager, 1 x BTXMED04 bed alarm sensor monitor, 1 x MED04BP bed sensor pad, batteries included.

ORDER CODE TUMAC1
PRICE £127.09 (£152.51)

TUMWPASKIT Cordless bed sensor pressure mat with caregiver pager

- New central and edge detect pressure sensor pad with concealed transmitter
- Caregiver pager with tone & vibration alarm notification (2 x AA batteries)
- Raises an alert to carer when patient sits on or falls off edge of bed
- Pager can monitor 3 x bed sensors (see WPAS10 page 29)
- Ready to use straight out of the box

Bed mattress clips

**FALL PREVENTION
MADE SIMPLE**

BED LEAVING ALARMS FOR SINGLE OR MULTIPLE PATIENTS

CTMV-CT3 Bed leaving detection alarm with recordable voice prompt

This kit is suited to people who may be confused when waking during the night. Upon rising from the bed a personalised message is played back as a warning or instruction. The CTMV is a receiver with 3 voice alarm channels that can be triggered by remote transmitters. A door alarm, for example, could remind a person a door is open before getting into bed.

- Under mattress pressure sensor 750mm x 450mm
- 3-Channel voice recordings of up to 15 seconds each
- Voice alarm CTMV powered by 3 x AAA batteries (included)

Complete kit **ORDER CODE CTMV-CT3 PRICE £56.83 (£68.20)**

BMDV11-BKIT Dual alarm bed monitor with recordable voice prompt and clothing clip pull-away alarm

This multi-function bed/chair exit alarm monitor from Rondish, offers state-of-the-art fall prevention technology for home and professional care use. The dual alarm trigger function (sensor pad or clothing clip) provides options for bed, chair or W/C. Can be cable connected to Nurse Call system.

- Pull cord clip alarm - use for bed, chair, W/C
- Bed under-mattress pressure sensor
- Recordable voice prompt - "stay in bed" etc

Complete kit **ORDER CODE BMDV11-BKIT PRICE £82.12 (£98.54)**

BMS-03BKIT Bed leaving alarm under-mattress pressure sensor, audible alarm and nurse call connection output

Basic bed leaving alarm which produces an audible alarm when a patient rises from their bed.

- Under mattress pressure sensor
- Sensor controller with audible alarm
- Sensor pad fault/unplugged alarm
- Powered by 3 x AAA batteries
- Nurse Call connection output jack socket

Controller with sensor **ORDER CODE BMS-03BKIT PRICE £66.00 (£79.20)**

TumbleCare by Medpage bed exit detection with pager alarm

The bed sensor is positioned under a patient's bed mattress to detect their presence or exit. On exit the alarm control transmitter sends a radio alarm signal to the carer radio pager to produce an audible and vibrating alarm notification.

- Complete bed exit detection alarm system
- Radio pager notification to bed exit
- Reduce falls in domestic and professional care
- Hard wearing materials
- Rubber protection jacket for alarm transmitter

ORDER CODE TUMBSMPLK PRICE £100.30 (120.36)

CBM-03PAGBKIT Bed leaving alarm kit with wire-free under-mattress pressure sensor and caller ID display pager

Totally cordless bed leaving alarm system. The alarm controller transmitter is concealed in the corner of the sensor. With no visible signs of the sensor under the mattress, tampering and damage by wire pulling is reduced. Kit includes PAG-11C caller ID pager and CBP-01 bed sensor with transmitter.

- Suitable for single or multiple bed monitoring
- Compatible with CMU-02, CMD-11C Nurse Call stations

Kit price **ORDER CODE CBM-03PAGBKIT PRICE £131.30 (£157.56)**

NMDTX-BKIT Under mattress bed leaving sensor for Care Homes

This kit is recommended for larger buildings, stone-built properties or buildings with known signalling difficulties. The bed pressure mat is 750mm x 450mm and is positioned under the bed mattress. When the patient rises from their bed a data encoded display message is transmitted to the carer pager. For example, 'Bed 1'.

The kit comprises of NMDTX2 long range POCSAG transmitter, 1 x CT-3 pressure mat and 1 x EM300 pager. An unlimited number of long range devices can be configured into a multiple care system. Single kit default message "Bed Alarm".

Single user kit **ORDER CODE NMDTX-BKIT PRICE £145.00 (£174.00)**

CHAIR LEAVING ALARMS FOR SINGLE OR MULTIPLE PATIENTS

CTM-3CKIT Chair leaving detection alarm with recordable voice alarm and pager

Falls often occur in the home when a person rises from their chair. With the CTM-3, a voice recording can be made for playback when a person rises from their chair, along with an alarm transmission to the included MPPL tone/vibrate carer alarm pager.

- Can help reduce falls and potential wandering with advanced warning of chair leaving
- Integral transmitter with typical range of to 100M
- Under cushion pressure sensor 380mm x 300mm
- Powered by 3 x AAA batteries or optional AC adaptor
- Monitor holding bracket included

Complete kit **ORDER CODE CTM-3CKIT PRICE £90.75 (£108.90)**

NMDRX-CTMCK Chair leaving detection alarm with wireless audible/flashing alarm

This kit includes the CTM-3 recordable voice alarm transmitter, chair pressure mat CT-2 and the NMDRX wireless tabletop alarm. The NMDRX is a 5-Channel alarm, which enables the inclusion of additional sensors, such as: Door alarms, worn fall sensors (FA6) or PIR (TUMPIR21). A comprehensive home care system is easily configured (See page 12).

- NMDRX suitable for deaf/hearing impaired carers
- 5 Independent flashing LED colours to assign to alarm channel - 100M wireless range
- Voice reminder and alarm receiver alert on chair exit

Complete kit **ORDER CODE NMDRX-CTMCK PRICE £99.99 (£119.99)**

NMDRX-NMDTXCKIT Chair leaving detection kit with channel selectable alarm transmitter

This kit includes the CT-2 chair pressure mat, NMDRX 5-Channel alarm receiver and the NMDTXM multi-function sensor transmitter. The transmitter channel codes are easily changed to allow additional chair monitors to be included in a system (up to 5) with the NMDRX indicating an active alarm with different coloured flashing channel LED's.

- NMDTXM powered by 2 x AAA batteries
- Transmission range up to 100M
- Advanced warning fall prevention/wander detection
- Portable alarm receiver with audible/flashing LED's

CHAIR LEAVING ALARMS FOR SINGLE OR MULTIPLE PATIENTS

TumbleCare by Medpage chair occupancy detection alarm system

The chair sensor is positioned under a patient's chair cushion to detect their presence or exit. On exit the alarm control transmitter sends a radio alarm signal to the carer alarm station to produce an audible and flashing light alarm notification.

- Complete chair exit detection alarm system
- Wireless carer alarm notification to chair exit
- Reduce falls in domestic and professional care
- Hard wearing materials
- Quality chlorine proof chair sensor
- Suitable for single or multiple patient chair monitoring (with additional monitors)

5-Channel alarm station

ORDER CODE TUMCSRXTK PRICE £100.30 (120.36)

CBM-03PAGCKIT Chair leaving alarm kit with wire-free under-cushion pressure sensor and caller ID display pager

Totally cordless chair leaving alarm system. The alarm controller transmitter is concealed in the corner of the cushion. With no visible signs of the sensor under the cushion, tampering and damage by wire pulling is reduced. Kit includes PAG-11C caller ID pager and CCP-01 chair sensor with transmitter.

- Expandable from a single to multiple patient system
- Alarm signal transmitted to pager upon rise from chair
- Compatible with CMU-02 & CMD-11C nurse call stations

Kit price **ORDER CODE CBM-03PAGCKIT PRICE £101.10 (£121.32)**

NMDTX-CKIT Under-cushion chair leaving alarm for Care Homes

This kit is recommended for larger buildings, stone-built properties or buildings with known signalling difficulties. The chair pressure mat is 380mm x 300mm and is positioned under the chair cushion. When the patient rises from their chair a data encoded display message is transmitted to the carer pager. For example, 'Chair Alarm 1'.

The kit comprises of NMDTX long range POCSAG transmitter, 1 x CT-2 pressure mat and 1 x EM300 pager. An unlimited number of long range devices can be configured into a multiple care system. Single kit default message "Chair Alarm".

Single user kit **ORDER CODE NMDTX-CKIT PRICE £139.00 (£166.80)**
